Groq and open ai model:

GPT-OSS 120B

Category	Details
Model Name	GPT-OSS 120B
Developer	Alibaba (Qwen team)
Model Type	Open-source large language model
Input Modality	Text
Output Modality	Text
Primary Capabilities	Reasoning, coding, multilingual tasks, content generation, instruction following

Whisper Large V3

Category	Details
Model Name	Whisper Large V3
Developer	OpenAI (hosted/accelerated by Groq)
Model Type	Speech-to-text (ASR) model
Input Modality	Audio
Output Modality	Text (transcription)
Primary Capabilities	Speech recognition, transcription, multilingual ASR, subtitle generation

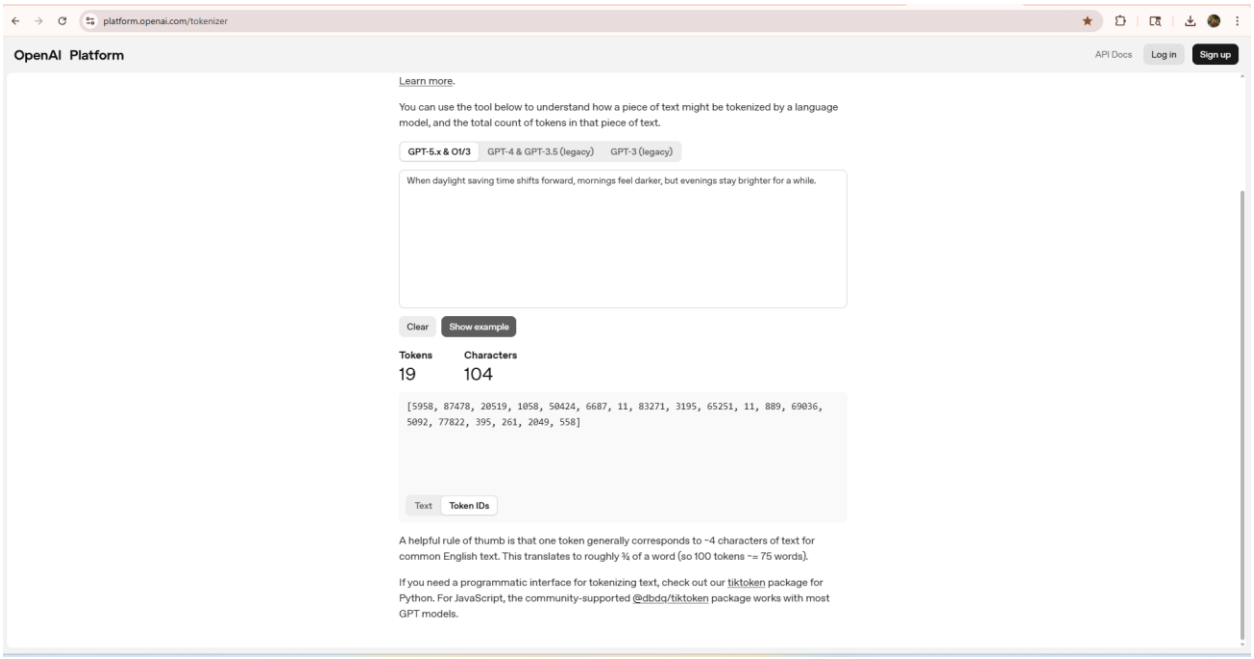
Open AI - Three models with context window , Input/output, Token cost

Model Name	Developer	Context Length	Input Token Price	Output Token Price
MiMo-V2-Omni	Xiaomi	262K tokens	$0.40 / M	$2.00 / M
Gemini 3.1 Flash Lite (Preview)	Google	1.05M tokens	$0.25 / M	$1.50 / M
GPT-5.4 Nano	OpenAI	400K tokens	$0.20 / M	$1.25 / M

Open AI Tokenizer:

Text1:

When daylight saving time shifts forward, mornings feel darker, but evenings stay brighter for a while.



Text2: Simple Ruby code

```
def greet(name)
  puts "Hello, #{name}!"
end

greet("World")
```

You can use the tool below to understand how a piece of text might be tokenized by a language model, and the total count of tokens in that piece of text.

GPT-5.x & O1/3 | GPT-4 & GPT-3.5 (legacy) | GPT-3 (legacy)

```
def greet(name)
  puts "Hello, #{name}!"
end

greet("World")
```

Clear | Show example

Tokens 20

Characters 61

```
[1314, 61400, 5587, 446, 220, 19237, 392, 13225, 11, 28319, 897, 92, 44450, 419,
279, 70, 5409, 568, 13046, 1896]
```

Text | Token IDs

A helpful rule of thumb is that one token generally corresponds to ~4 characters of text for common English text. This translates to roughly ¾ of a word (so 100 tokens ~= 75 words).

If you need a programmatic interface for tokenizing text, check out our tiktoken package for Python. For JavaScript, the community-supported @dbdq/tiktoken package works with most GPT models.
